

It is my understanding that the FCC is considering making changes to the way FM radio is currently heard in our community and this change may affect our ability to hear our favorite radio station, Air-1. This station is the only contemporary Christian station in our area. Our area has a strong Christian base and this station gives our youth a positive alternative to the other radio stations available. We all need the ability to listen to something besides music that promotes gangs, drugs, and sexual promiscuity. Our youth deserve better. We believe that the alternatives are contributing to the moral decay of our country. This radio station gives our youth hope and they are able to give hope to others who are without hope. Many lives have been saved by this radio station, from people considering suicide, people currently killing themselves with drugs, and other issues. Please take the effects of this national station into consideration before making a decision that would impact many, many lives and the future of our country, our youth.
